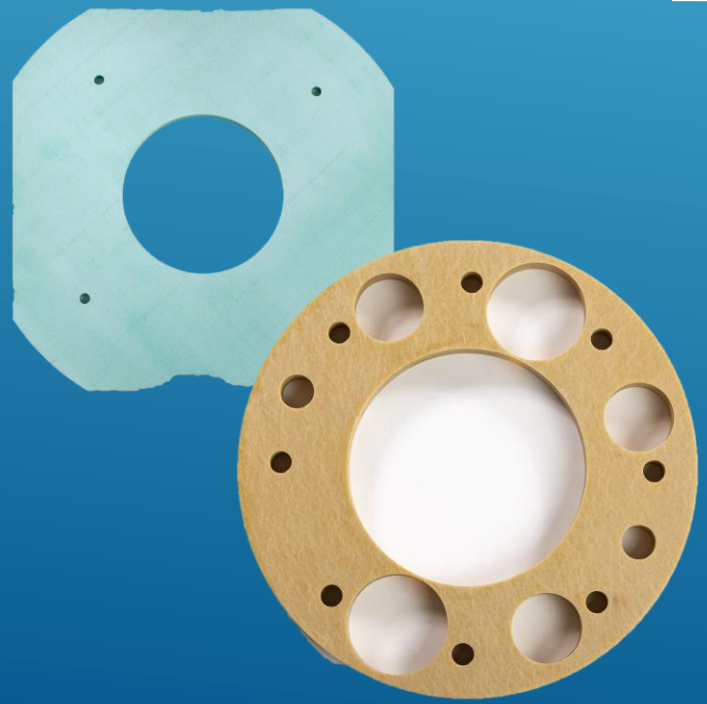
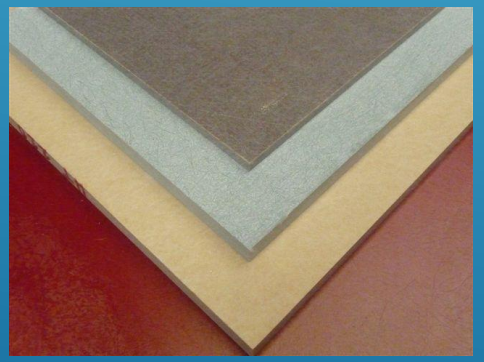
THERMALLY INSULATING PANEL





LABARA

High-strength, temperature resistant insulation made from glass fibre reinforced composite materials

They play a very important role in accurate temperature controls and energy conservation.

They are employed wherever thermal separation is required for operational and/or economic reasonsbetween components in installations..

LABARA

THESE ALL OFFER THE FOLLOWING SPECIAL CHARACTERISTICS:

LABARA

GLASTHERM HT 200	GLASTHERM HT 220	GLASTHERM HT 250 M
❖ max. continuous operating temperature 200°C ❖ measurements: 1255x2455 mm 918x1828 mm	❖ max. continuous operating temperature 220°C ❖ measurements: 1220x2440 mm 1000x1900 mm	❖ max. continuous operating temperature 250°C ❖ comperessive strength 445 Mpa ❖ measurements: 1100x2000 mm 1100x3000 mm
GLASTHERM HT 250 HQ	GLASTHERM HT 300	GLASTHERM HT 500
❖ max. continuous operating temperature 250°C ❖ compressive strength 510 Mpa ❖ measurements: 1120x2000 mm 1120x3000 mm	❖ max. continuous operating temperature 300°C ❖ measurements: 1070x1240 mm 1240x2800 mm	❖ max. continuous operating temperature 500°C ❖ measurements: 1000x1200 mm
